What's New

Changes in version 5.4.1

AuditBase

Office management system by Auditdata.
Version 5.4.1 released for Denmark, Norway, Sweden, and the UK.

What's New

Client

- Updated date of birth processing for new Swedish CPR number formats
- Default Alert values added for NHS Communication needs - Accessibility options

Clinical records

COSI

- Text answers as well as existing percentages are shown for improved engagement with patients.
- Follow up question is improved to remove reference to 'person with normal hearing'
- Standard NAL specified situation categories can be chosen to match the client's situation for comparison with other NAL users.
- COSI printout is updated to reflect the new questionnaire features

DR Med questionnaire

- Space has been increased for the comments fields 'Balance; Hearing tab – Other description' and 'Lifestyle; Communication tab – Leisure/social activities'

Journal

- Changing the date on a Journal entry before signing is now an Extended User Right

Treatment Summary

- A Treatment Summary can now be linked to an appointment
- If a Treatment Summary is linked to an appointment the Audiogram can default to the one linked to that appointment
- Preview, Print and Submit Electronically are moved to one single dialog in Treatment summary
- The selected Treatment Summary now remains selected after signing

Hearing instrument related

Stock

- Support for new UDI/GS1 barcodes, including two part, long and 2D matrix QR codes

- Migration of Danish barcodes to the new EHIMA UDI/GS1 style.
- A longer length is supported for Supplier/article number in Stock

Measurement and clinical

Audiometer and tymp interfaces

- Tymp measurement and direct import via Noah for Otowave 202 and 302 as well as 102.

Auditory Implant Module – optional

- Multiple preferences can now be set for a patient's Implant accessories with a table instead of combo boxes
- Preferences from the Pre-Op Assessment form will now be copied to the Client Information Implant tab.
- Surgical Consent date selected on the Pre-Op Assessment form will also show on the Implant tab of the Client Information screen
- The Medical History form (DR-Med) can be linked directly to a pre-op form and opened and edited from there

NOAH

- Update to Noah 4.7
- If the Noah module supports it a summary of the Noah action can be shown in a pop-up image or pdf by clicking on the 'eye' icon

Speech tests

- If any Tests under the groups Audiology, Teacher of the Deaf or Speech Therapist are recorded as 'Not Administered' then the content will be disabled and any screens referencing them such as Baseline Test on the Pre-Op Assessment form will show 'No score'. They will be not be able to be added to Compare Tests graphing

Scheduling

Booking

- Booking code refactoring to improve maintainability

Views and Navigation
